

Pact of Islands monitoring tools in support of Clean Energy for EU Islands

CE4EUI Webinar

13 November 2019

Kostas Komninou

General Director, DAFNI Network of Sustainable Greek Islands

Vice President for Smart and Sustainable Islands, FEDARENE

Network of Sustainable Greek Islands DAFNI

DAFNI, a non-profit organization, is a **network** of island local and regional authorities. It's comprised of **44 Municipal and 4 Regional members**.

DAFNI **promotes sustainable development** in Greek islands through integrated actions in the fields of energy, environment and culture

DAFNI is a **founding member of the Pact of Islands** initiative promoting sustainability in European islands through local energy planning

DAFNI is the **coordinator of the Smart Islands Initiative** promoting islands as ideas areas for innovative projects in the fields of energy, environment, transport and mobility

DAFNI is **subcontractor of the Clean Energy for EU Islands Secretariat** to disseminate the initiative in the Greek islands

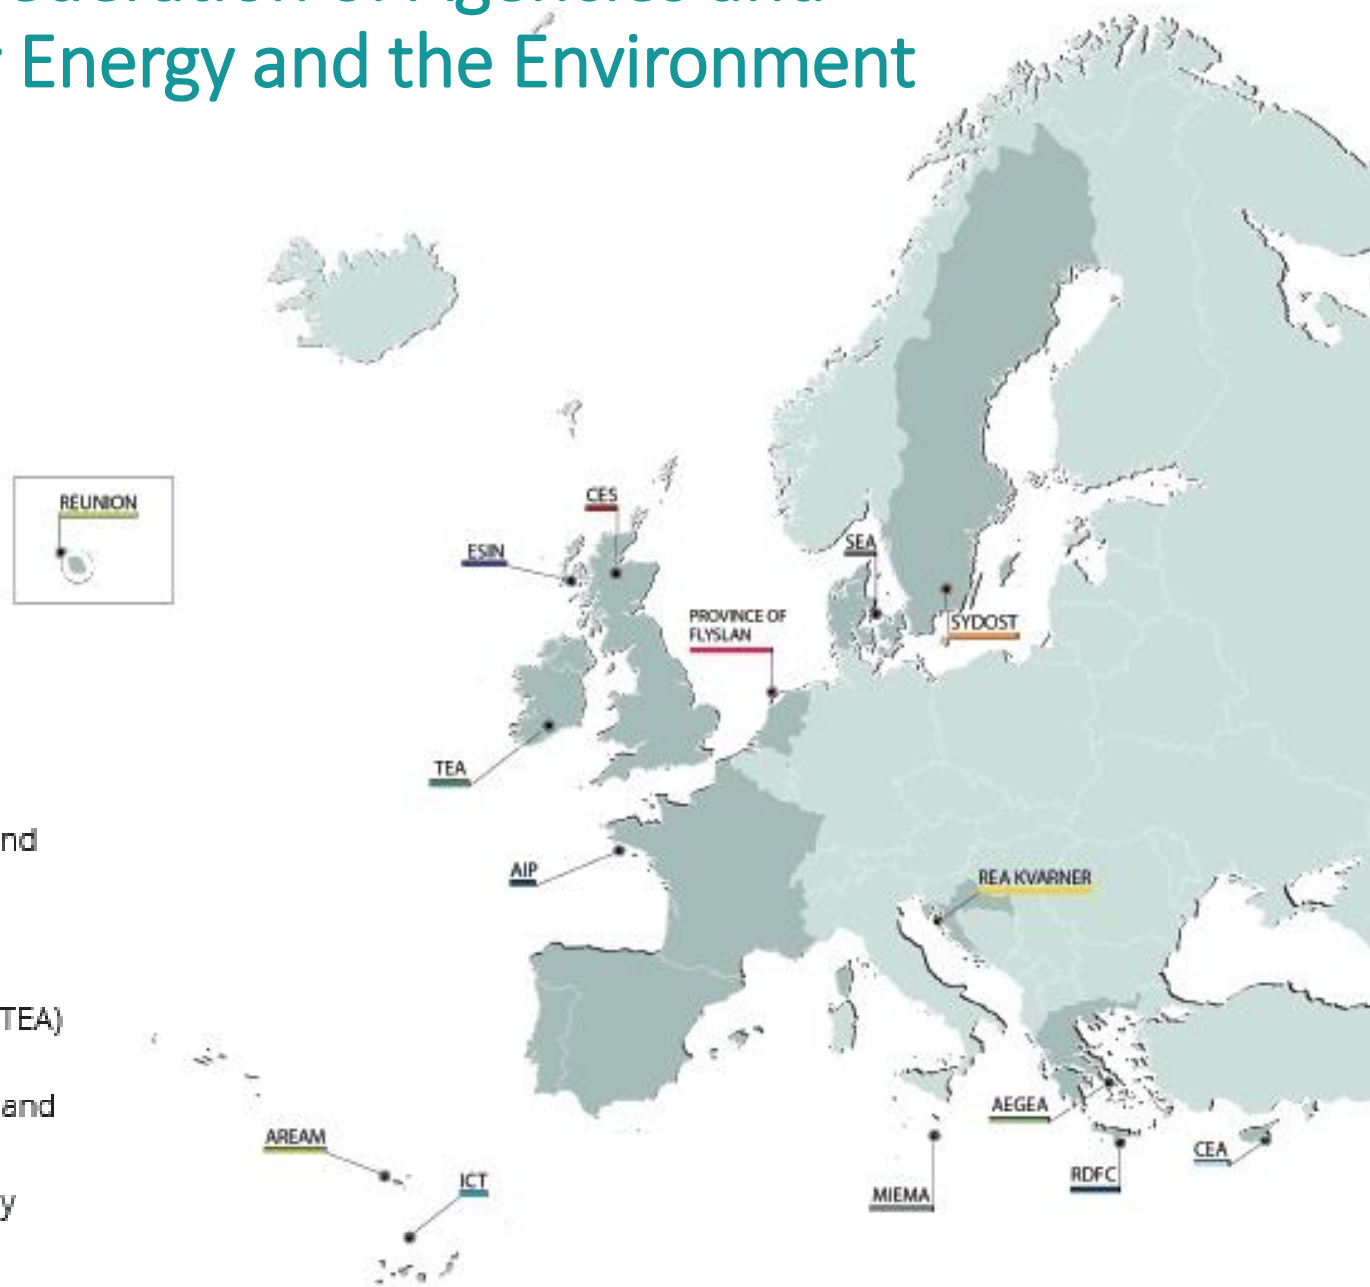

European Federation of Agencies and Regions for Energy and the Environment

Islands College

- EL | Aegean Energy & Environment Agency (AEGEA)
- PT | Madeira Regional Agency for Energy & Environment (AREAM)
- UK | European Small Islands Federation (ESIN)
- NL | Province of Fryslan
- HR | Regional Energy Agency Kvarner (REA KVARNER)
- CY | Cyprus Energy Agency (CEA)
- MT | Malta Intelligent Energy Management Agency (MIEMA)
- FR | Ponant Islands Association (AIP)
- FR | Reunion Island SLP Energies
- DK | Samsø Energy Academy (SEA)

- EL | Regional Development Fund of Crete (RDFC)
- ES | Canary Islands Institute of Technology (ICT)
- IE | Tipperary Energy Agency (TEA)
- UK | Community Energy Scotland (CES)
- SE | Southeast Sweden Energy Academy (SYDOST)

The Path towards the Clean Energy for EU Islands Initiative

Pact of Islands | How it all started

- ISLE-PACT project 2009 – 2012 funded by DG TREN to promote **local sustainable energy planning in EU islands**
- Initiative launched in 2011 under ISLEPACT project to promote **local sustainable energy planning** in islands
- An initiative **in liaison to the Covenant of Mayors** but focusing on the islands' special characteristics
- **Island Sustainable Energy Action Plans (iSEAPs)** produced by the signatories
- **iSEAPs conducted on island-scale** (except of Cyprus and Malta)
- **Methodologies and tools** for planning and monitoring the iSEAPs provided to the signatories
- **117 signatories** from all Member States with islands
- From 12/2016 Pact of Islands is **fully compatible to Covenant of Mayors** and iSEAPs can be converted to SEAPs and evaluated by JRC

Pol monitoring methodology | Monitoring process

The monitoring process shall be divided in two phases referring to different timings and activities of the process.

1. Monitoring data collection

- Starts after or even before the delivery of the initial SEAP
- Requires a well defined and efficient data network

2. Reporting on SEAP progress

- Materialize the monitored information

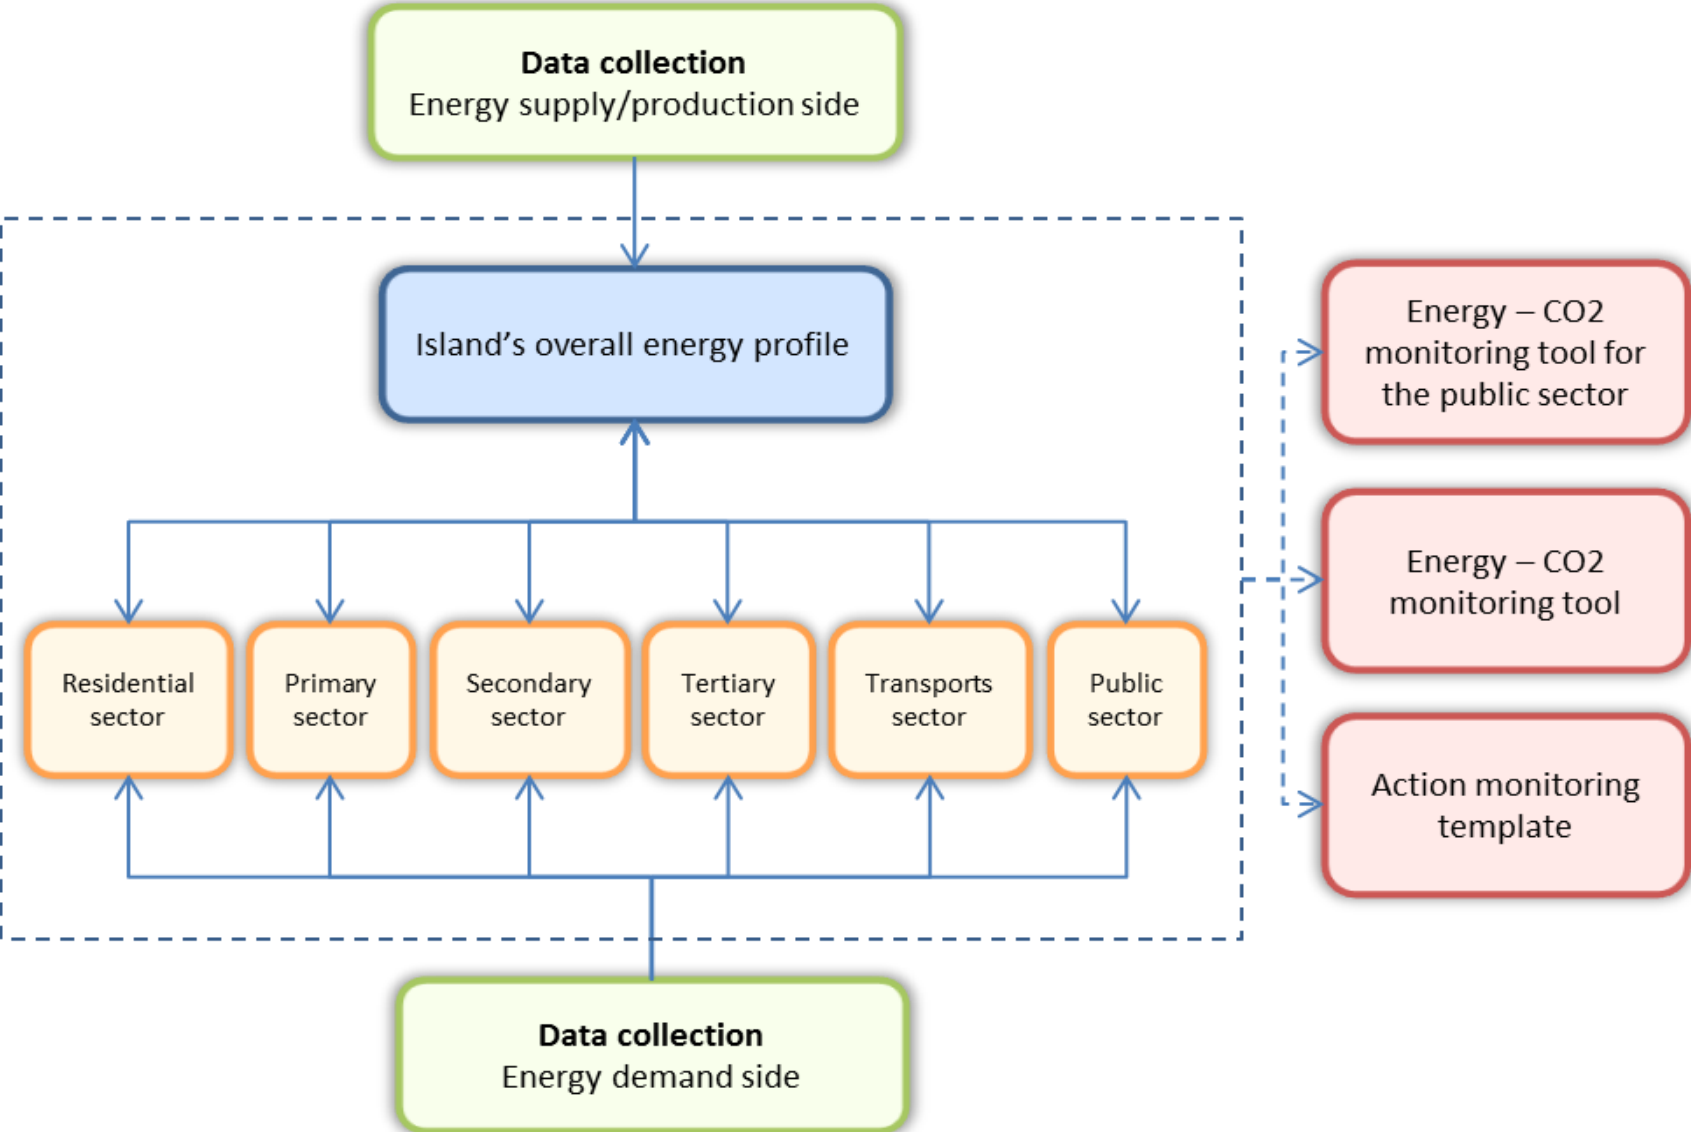

Pol monitoring methodology | Monitoring data collection

- Dynamic continuous monitoring
- The progress of every action should be monitored periodically
- Energy data from different sources (supply side, demand side, public sector, etc.) should be collected

Monitoring tools are needed for the data collection process

	Energy supply/production side	Energy demand side	
	<ul style="list-style-type: none"> • Electricity production companies • Electricity network operator 	<ul style="list-style-type: none"> • Public sector • Residential sector 	
Progress of action plans, comment	<ul style="list-style-type: none"> • Regulatory energy authorities • District heating/cooling companies 	<ul style="list-style-type: none"> • Primary sector 	
Energy data collection bills on a month	<ul style="list-style-type: none"> • Fuel importers 	<ul style="list-style-type: none"> • Secondary sector • Tertiary sector 	the public sector"
Energy data collection questionnaires	<ul style="list-style-type: none"> • Gas stations • Customs 	<ul style="list-style-type: none"> • Transports sector

Examples of monitoring tools

1. [“Action monitoring template”](#)

- Actions key data (expected - actual)
- Milestones - Timetable
- Comments/Details

2. [“Energy - CO₂ monitoring tool for the public sector”](#)

- Public sector energy profile per activity and energy carrier
- Graphical data depiction - Indicators

3. [“Energy - CO₂ monitoring tool”](#)

- Comparison of baseline and monitoring emission inventories
- Graphical data depiction – Indicators
- Data collection through questionnaires ([Monitoring Questionnaires tool](#))
